SCREENING PRODUCTS

We'll keep your business rolling!

For quality roller coverings and parts, you can't go past ACPL.

For over 50 years, ACPL Rollers has been perfecting the art of manufacturing quality polyurethane and rubber roller coverings and custom-moulded parts.

We also manufacture and supply innovative products to the concrete ready-mix and tracked machinery industries.

ACPL Offer Quality and Service second to none. Your products will match your quality expectations as a result of our uncompromising commitment to quality, thereby eliminating costs associated with poor quality products.

How do we do it? With a team of talented staff, state-of-the-art equipment - and nothing but top quality materials. We also offer a hassle-free pick-up and delivery service which is free for all our Melbourne clients.

What more could you possibly want?

For first-class products and services you can rely on, contact **ACPL Rollers** today or call (03) 9762 6011.

POLYURETHANE ROLLERS

Polyurethane - a material like no other!

We choose polyurethane to produce our rollers and parts because it is a resilient, flexible and durable plastic material that performs well across thousands of applications.

RUBBER ROLLERS

Modern manufacturing!

Our modern rubber plant machinery includes mixing mills, grinders, sheet-building and extruder-roll-building machinery. We also have a state-of-the-art autoclave vulcaniser to hot vulcanise rollers and pulleys up to 1000 mm in diameter.

ACPL PARTS

Polyurethane - the smart choice!

When it comes to parts, polyurethane performs. This amazing material can be used for all kinds of parts across a range of industries.

We manufacture polyurethane parts for all kinds of applications.

And if you need a part that's never been made before, we can help you with that too.

SCREENING PRODUCTS

For screens that stand the test of time!

At ACPL, we produce quality, long-lasting polyurethane and rubber products for all kinds of screening applications.
